

Safety Connection

Always Keep Your Hospital Staff Safe

Protect Your Staff and Patients

Uniformed guards, cameras and locked doors can't fully protect the open-environment approach of today's hospitals and remote clinics, along with its increasingly mobile workforce. With the increasing prevalence of active assailant and workplace violence incidents, hospitals need a reliable, immediate way for staff to share threats, supporting the "See Something... Say Something" programs.

Everbridge Safety Connection, provides an instant way for staff to call for help, leading to an improved response time and de-escalation of a situation. One of the platform's many features includes a mobile panic button with two-way communication.

The platform also provides your security team with situational awareness, location-detection capabilities, and communication abilities to ensure your people are always safe and your hospital is secure.

Incident zone around a critical event.

Use the app for check-ins, SOS, and more.

KEY BENEFITS

- + Mobile Panic Button allows staff to request assistance in times of need.
- + Enable 'See Something...Say Something' programs through two-way communication.
- + Instantly notify staff and first responders of a potential incident.
- + Automatically warn people entering an area with active events.
- + Improve response time and de-escalate incidents.

Safety Connection

Always Keep Your Hospital Staff Safe

THE EVERBRIDGE ADVANTAGE

Dynamic Locations

Staff members last known and expected locations are displayed on an incident map by continuously cross-checking data from access control systems, HR systems and smartphones, among other sources.

Incident Zones

Virtual geographic boundaries are drawn around a critical event or danger zone using GPS data. Notifications and alerts are automatically triggered when a device with the Everbridge mobile app approaches the incident zone.

Threat Intelligence

More than 100 out-of-the-box integrations with leading threat intelligence providers -including **NC4**, **WDT**, and **Twitter** – provide unparalleled situational awareness. Custom or preferred data feeds can be easily added to ensure you have the information most relevant to you.

See Something, Say Something

With Safety Connection, there's no limit to the number of messages or recipients, enabling every staff member to send internal notifications for fast communication that can de-escalate incidents and improve response during disruptions.

Mobile Panic Button

Automatically notifies first responders, providing the geo-coded location of a staff member while transmitting live audio and streaming video of the surrounding area. Locations are tracked only when permission is expressly given, ensuring end-user control and full privacy.

Safe Corridor

Safe Corridor tracks recent locations, leaving a trail to the last site visited. If a staff member fails to check-in, an SOS alert will instantly be triggered, sending an emergency request to your team or first responders.

Whether working at a satellite clinic or area of the hospital with less foot traffic, visiting a patient at home, or even walking to the parking garage after completing a midnight shift change, Everbridge Safety Connection keeps staff informed and safeguards their well-being.

About Everbridge

Everbridge is a leading unified critical communications platform trusted by corporations and communities of all sizes that need to reach the right people for immediate action, collaboration, and decision-making. Connecting millions of people and internet-connected devices, the company provides reassurance that secure, compliant messages are delivered, locally and globally, received and responded to, no matter the recipient's location. Everbridge is based in Boston, Los Angeles, San Francisco, Beijing and London.
